## **Announcement of Essay Game 2015**

After 3 months from the launching date, the Essay Game 2015 of the University of Science and the US Education Agency organized, we have received nearly 300 entries from more than 50 high schools across Vietnam. Many interesting stories are about their inspiring professors in candidates' lives, who carried the momentum and exert a profound influence for the students.

In May 23<sup>th</sup>, the International Training & Education Center (ITEC) and US Education Agency held an awards ceremony for the Essay Game 2015 with the participation of nearly 100 parents, students and representatives from various highschoools.

Giving a speech at the ceremony, Mrs. Malikat Rufai, a cultural Attaché Consulate General of United States, said:" it's intresting and touching when reading the essay about professor's jobs, what they have shown beyond far my expectations. Education always gives us a good foundation and guide us to follow the bright path to their students which is wonderful."

Critically, the essays must express truthful and deepest emotions toward the specific professor through the ability to write English fluently, accurately and convey their feeling. The organizers have worked hard to select the most deserving entries for the award. Below is a list of students with the highest winning entries:
